

# 1MICRO

## THE MOST ADVANCED KEY MANAGEMENT SYSTEM.

Never lose track of keys or plates again.

With 1Micro you know which keys/plates are in or out and you will have a time-stamped photo record of every employee who uses the checkout. Detailed reporting provides information on inventory, sales, and employee activity. Salespeople can use it to display vehicle information and photos, or to print vehicle information for a test drive. Dealertrack DMS integration provides automatic updates to the 1Micro system, adding a vehicle when stocked and removing it when sold.

### Features and Benefits:

- Only authorized users are able to check out keys using a proximity card or biometric scanner.
- An intuitive touch screen makes it simple to manage keys and plates with little to no training.
- Access audit trails for vehicles and users to identify which vehicles are being test driven and not sold, and those that are never driven.
