

DEALTRANSFER

Effortlessly move critical customer information between the Dealertrack credit application and your Dealer Management System.

Dealertrack's DealTransfer® enables integration of third-party vendor platforms with our credit application solution — eliminating the need for anyone in your dealership to manually re-enter data from one system into the other. DealTransfer saves valuable time by providing your dealership with increased data accuracy and instant data transfer, giving you more time to sell and boost profits.

Features and Benefits

- Automate transfer of information to reduce re-entry errors.
- Increase F&I department efficiency, and reduce potential delays for your customers.
- Streamline processes and gain more time doing the work you do best.
