

## Make your service department a model of efficiency.

Automatically dispatch electronic repair orders from your Dealertrack DMS.

Service Dispatching increases the effectiveness of your service department by allowing you to electronically dispatch repair orders to technicians based on criteria such as repair order priority, required skill level and the vehicle promise time.

### Features and Benefits:

- **Automation** – Increase efficiency and go paperless with automatic and electronic repair order dispatching.
- **Productivity** – Continual flow of repair orders reduces the time technicians spend waiting for work.
- **Customer satisfaction** – Enhances ability to complete repair work by the promised date and time.
- **Efficiency** – Assign repair orders by priority, skill level and promise time for the vehicle.
